

Features

- Adsorbs Acids
- Removes Color

Applications

- Transformer Oil
- Electro-Hydraulic Oil
- Lubrication Oil
- Transmission Fluid
- Vegetable Oil
- Wine Filtration

System Compatibility

Allen Fuller's Earth Filter Element

The Allen Fuller's Earth Filter Element (FE) uses the inherent properties found in the palygorskite family of clays (fuller's earth) to adsorb acids and remove color from oils. Fuller's Earth Filter Elements are the perfect solution for purification of transformer oil, electro-hydraulic oil, lubrication oil, transmission oil, and vegetable oil. They can also be used in wine filtration and purification.

Outside Diameter	7 or 11 in (17.8 or 27.9 cm)
Inside Diameter	2.5 in (6.4 cm)
Length	18 or 22 in (45.7 or 55.9 cm)
Weight	18.25 lb (8.3 kg)
Replacement Pressure	35 psi (241,316.5 Pa)
