## Allen Microfiber Filter Element

The Microfiber Filter Element (MW) is designed to adsorb oil from water. The MW filter element is produced from 100% melt blown microfiber that can absorb up to 15 times its weight in oil while allowing the purified water to pass right through. The MW filter element is best suited for separating petroleum-based fluids from water, moist air, and other gases. It is available from 0.5 to 10  $\mu\text{m}$  filter sizes.

<b>Outside Diameter</b>	7 or 11 in (17.8 or 27.9 cm)
<b>Inside Diameter</b>	2.5 in (6.4 cm)
<b>Length</b>	18 or 22 in (45.7 or 55.9 cm)
<b>Weight</b>	16 lb (7.2 kg)
<b>Water Removal</b>	15x weight of filter element
